

Make Canada's railways an essential service

We need Parliament to ACT NOW!

This past year Canadians have weathered Covid, flooding in BC, a drought on the prairies, blockades, global disruptions to supply chains and growing concerns from the war in Europe. Inflation is skyrocketing with major price hikes on everyday essentials like food, gas and household items. Now we are being told that one of the major railways has management and a union at odds with one another and both are threatening to either lock-out or strike. Enough is enough. Ottawa needs to act by making rail an essential service under the Canada Labour Code and not allow either one company or one union to shut down the nation's rail network which is our economy's lifeblood. We cannot afford to face another massive disruption to our economy where everyday Canadians will pay the price.

Say No!

TO A STRIKE OR LOCK-OUT AT CANADIAN PACIFIC RAILWAY.
